Introduction

My name is BJ Min. My quick story is that I went from being a once broke convenience store clerk to eventually earning over a million dollars in sales online.

But my success didn't happen overnight.

I went through a lot of trial and error of my own like most people who eventually started to make a fulltime income online.

I wanted to create this report to SIMPLIFY internet marketing and making money online in 3 simple steps.

Let's get started!

Step 1: Find a Product to Sell Online!

If you want to make money online, you first need to find a product to sell online.

For beginners, I recommend you to promote an affiliate product.

An affiliate program is a product created by someone else that you can sell online.

Now, there are 2 components of an affiliate program you want.

First, you want to make sure you can make RESIDUAL INCOME online. That means, you can get paid MONTH AFTER MONTH for 1 single sale!

Second, you want to make BIG TICKET COMMISSIONS ONLINE. That means, you can get up to \$3000 or more in big ticket affiliate commissions for 1 single sale!

The best type of affiliate program that you can get paid BOTH residual income and big ticket income is joining a simple business opportunity program.

Out of many different business opportunity programs that I have researched, I recommend this one program.

With this one program, you can get paid BOTH RESIDUAL INCOME and BIG TICKET INCOME as an affiliate marketer.

Step 2: Get Traffic!

The next step after you join an affiliate program is to get TRAFFIC!

There are 2 different ways to get traffic.

One is to get traffic for FREE!

Second is to get traffic buy PAYING for traffic.

FREE TRAFFIC

For FREE TRAFFIC, I recommend getting traffic using YouTube videos because that is the FUTURE of FREE TRAFFIC.

With YouTube videos, you can get traffic from Google searches and YouTube searches which are the TWO biggest search engines in the world.

PAID TRAFFIC

Another way to get traffic is to BUY TRAFFIC from a traffic vendor. That basically means you go to a traffic expert and pay them to get traffic to your website.

Out of the many traffic vendors out there, I recommend ONE traffic vendor that I personally use and buy traffic from.

Let me share with you the TOP 10 most popular website traffic strategies.

1) YouTube - This is by far my favorite strategy. You just simply create a video and upload to YouTube which is the 2nd biggest search engine in the world. The key is to know how to optimize your videos and do seo to your video to rank higher in Google and YouTube. That takes a lot more study but

it's worth it when you finally get it. [Click here to get my YouTube traffic strategy.](#)

2) Facebook Advertising - There are two ways to use facebook to advertise. One, you can use your own facebook fanpage and give lots of value to attract a lot of people and then promote your offers once in a while using "social media strategies". Another popular way is to use the facebook paid advertising platform to promote your website or your fanpage. The paid method is very simple to use and anyone can get started to get quality leads into their funnel.

3) Pay Per Click (Google Adwords or Bing) - The two most popular pay per click networks (other than facebook) is Google Adwords and Bing Ads. Very simple to set up pay per click campaigns and get traffic to your website. The KEY is to be very targeted in your advertising (keywords, ads, target market, etc.) and constantly split test ads and then scale up with your best performing ad.

4) Solo Ads - You pay someone to send an email to their list about your offer/website. This is very simple and can be powerful if you find the right solo ad vendor. Check out warrior forum classified ads for solo ad sources.

5) Joint Venture/Ad Swap - This is similar to a solo ad but you are doing an email blast to your list for someone and that person is doing it for you too. You can find someone with a similar list size as your and make agreement to email each other's offer to the list. You both mutually get traffic from each other. Go to clickbank marketplace to find joint venture partners in your niche if you have your own product. Go to safe-swaps if you want to swap ads with emails with other list owners.

6) Banner Advertising - This is simple as going to Google, searching for a top blog or forum in your niche, and contacting the website owner to advertise your banner in their site! An easy way to advertise your site for newbies! You can also use other banner ad platforms like buysellads and advertising your banner ads throughout other sites.

7) Article Marketing - You can write high quality articles and submit to top article directories which tend to rank higher on the search engines and thus gives you a lot of exposure to your website. Ezinearticles is one of the most popular article directories online and which I have used for a long time.

8) Press Release - You can write a simple press release and submit to press release websites which can get seen by other media and bloggers who may want to know more about your offer.

9) Pay Per View - This can be another way to get cheap clicks if you know what you are doing. Some popular PPV platforms are TrafficVance and LeadImpact.

10) Affiliate Program - If you have your own product, you can set up your own affiliate program so OTHER affiliates can drive traffic to your website. This is one of the most popular and powerful ways to really scale up your traffic to the next level. Set up your own product on Clickbank or JVZoo to attract affiliates to promote your product for you.

There you have it. These are my TOP 10 strategies that have been proven to work the best for me over the years.

I encourage you to study and test out as many as you can.

...THEN, you want to find out what strategy got you the BEST RESULTS and MOST RESONATES with you.

One way to find out what traffic strategy worked is to ASK YOUR CUSTOMERS where they found you.

Do a quick survey. Wherever they found you the most can be a clue to what traffic strategy works the best for you.

So starting today, TAKE ACTION in testing out different traffic strategies.

Don't just try traffic strategies once. But keep at it because the more you keep at it, the better you get at it.

I've tested out all kinds of traffic strategies and I know what works and what doesn't work after testing things myself as well as having met many successful marketers in this industry.

I recommend 2 ways to get traffic (YouTube and Buying Traffic).

Step 3: Build and Email Your List for Maximum Profits

The next step is to build and email your list for maximum profits.

Internet marketing can be broken down into TWO core steps:

- Build your list
- Email your list

[Click Here to Discover How to Make Money with Simple 5-Minute Emails!](#)

That's pretty much the 3 core steps to make money online.

The KEY is to email your list on a consistent basis.

I recommend at least 1 email a week...ideally 2-3 a week.

Pick one affiliate program that converts and promote it every week.

It only takes 5 to 15 minutes to write an email.

You just have to do it 2 to 3 times a week and you can make MAXIMUM income online.

Plus whatever programs made you money, you can insert that into your autoresponder series using your email autoresponder. ([Click here to get my #1 recommended email autoresponder](#)).

Bonus Chapter: How to Make THOUSANDS from a Simple \$10 Investment!

If you are a complete newbie who wants a SIMPLE way to make money online, then let me share with you another GOLDEN strategy.

That is to buy website names for \$10 and then sell it for THOUSANDS online!

This is a VERY newbie friendly strategy.

So if you don't want to do the typical internet marketing things like getting traffic, email marketing, and so forth, then...
